

For the months of June 2009 – Oct 2009 the following seasonal rates will be applicable for water consumption:

All regular water customers with consumption greater than 10,000 gallons may be subject to a surcharge.

(Your actual consumption during June 2009 – Oct 2009 will be compared to your average winter consumption from Jan 2009 – Mar 2009).

Seasonal Rate will be charged accordingly as shown below:

Example 1:

If your average winter consumption (Jan 2009 - March 2009) is 9,000 gallons, and your consumption during June 2009 is 15,000 Gallons

Here is how you will be charged:

- Is consumption more than 10,000 Gallons – YES
- Comparison with average Winter Consumption
 - 125% of Winter Average is 11,250 Gallons
- How much will I pay?
 - Residential rate for consumption up to the 125% level = \$43.42 (11.25 x \$3.86)
 - Tier 1 seasonal rate applied to consumption over the 125% level = \$18.11 (3.75 x \$4.83*)
 - Total charged for water consumption = \$61.53 (\$43.42 + \$18.11)

*\$4.83 is the Tier 1 seasonal rate (\$3.86 retail rate + \$.97 surcharge) for consumption > 125% of winter average.

Example 2:

If your average winter consumption (Jan 2009 - March 2009) is 9,000 gallons, and your consumption during June 2009 is 20,000 Gallons

Here is how you will be charged:

- Is consumption more than 10,000 Gallons – YES
- Comparison with average Winter Consumption
 - 125% of Winter Average is 11,250 Gallons
 - 200% of Winter Average is 18,000 Gallons
- How much will I pay?
 - Residential rate for consumption up to the 125% level = \$43.42 (11.25 x \$3.86)
 - Tier 1 seasonal rate applied to consumption over the 125% level and up to the 200% level = \$32.60 (6.75 x \$4.83*)
 - Tier 2 seasonal rate applied to consumption over the 200% level = \$15.44 (2 x \$7.72**)
 - Total charged for water consumption = \$91.46 (\$43.42 + \$32.60 + \$15.44)

*\$4.83 is the Tier 1 seasonal rate (\$3.86 retail rate + \$.97 surcharge) for consumption > 125% of winter average.

**For consumption > 200% of winter average, the Tier 2 seasonal rate of \$7.72 (\$3.86 retail rate + \$3.86 surcharge) will be applied

Effective June 1, 2009, Builder and Irrigation accounts will be charged at 2.0 times the retail rate for all water consumed (\$3.86 x 2 = \$7.72).
